

# Senior Microelectronics Engineer

Seeking candidates with more than 10 years of experience in developmental programs of mixed signal Microelectronic integrated circuits.

Must have in-depth understanding of state-of-the-art CMOS mixed-signal micro-electronics design and test approaches.

at the transistor level.

The candidate will possess strong circuit design, modeling and related skills.

Duties include design, synthesis, simulation, and analysis of advanced CMOS mixed signal ASIC solutions.

Substantial analog design skills at the transistor level is important.
